Setting up scientific programme in Indico

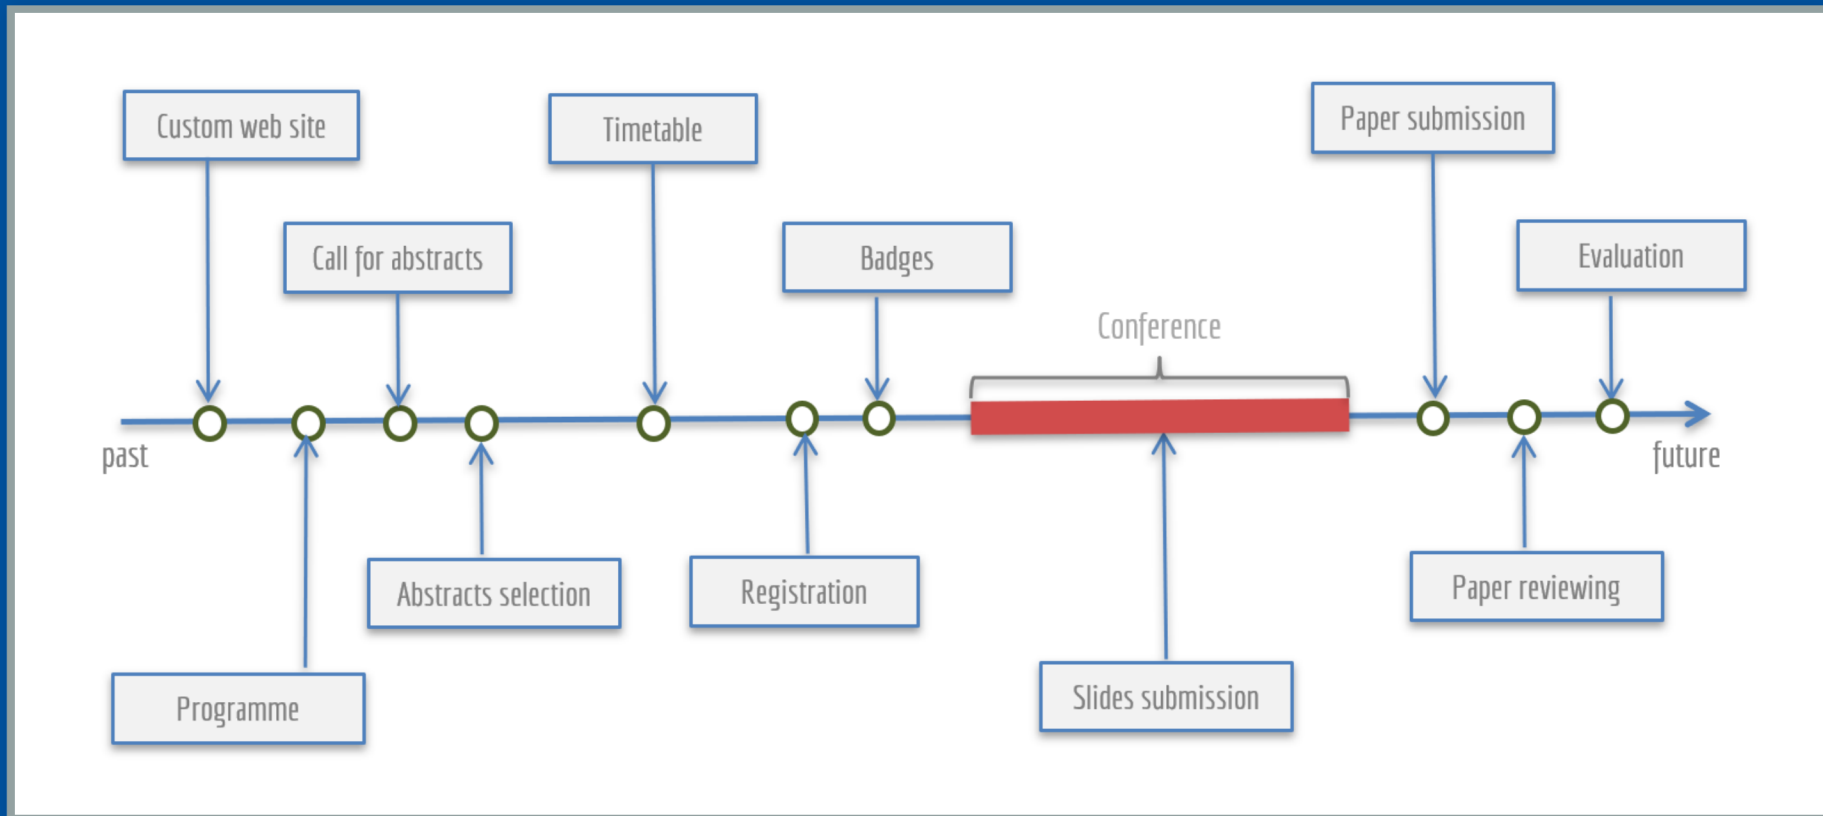

Natalia Juszka, CERN

JACoW TM, December 2019, Santos

Why Indico?

- **All conferences in one place**
- **Easy set up of events** - one click creation
- **User-friendly modern interface**
- **Flexible role system:** roles and permissions
- **Simple, but extensible** workflow
- **Integrated reviewing workflows** (abstracts, papers)

Indico conference lifecycle

Scientific programme creation step by step

1. Create tracks and track groups

- Equivalent of classification and subclassification in SPMS
- Structure conference topics and expose them to authors

Customization

Programme

Tracks represent the subject matter of the conference. They represent both the basis for the Scientific Programme and a taxonomy that can be used to classify submissions during the Call for Abstracts process.

Programme

Configure the conference page displaying the scientific programme.

Configure

List of tracks and track groups

+ Add track group

+ Add track

Particle physics

All topics in particle physics

Accelerators

Presentations only about accelerators

Detectors

Presentations only about detectors

2. Set up Call for abstracts

- Setting up contribution types (Poster, Oral)
- Authors submit summary of the paper
- Authors can select which track their abstract belongs to

 - Detectors
 - Computing**
 - Offline Computing
 - Accelerators

3. Select abstracts

- Roles:
 - **reviewers** - proposing to accept/reject abstract for given track
 - **conveners** - collect reviews for given track and propose decision
 - **judges** - make a final decision

Submitted

Natalia Karina Juszka submitted this abstract

Author: Panagiota Pouloupoulou

Interesting topic in particle physics proven by this formula $d = \sqrt{a + b - c}$.

Natalia Karina Juszka submitted this abstract - 28 Nov 2019

Author:

Panagiota Pouloupoulou (CERN)

Speaker:

Panagiota Pouloupoulou (CERN)

Natalia Karina Juszka left a review - 29 Nov 2019 - edited

[Particle physics: Accelerators](#)

Proposed to accept as Oral

Topic relevant to our conference

4. Create timetable

- Setting up sessions and contributions
- Abstracts -> contributions
- Content publishing
- Conference codes assignment

- Overview
- Scientific Programme
- Call for Abstracts
- Reviewing Area
- Timetable**
- Contribution List
- Book of Abstracts
- Participant List

Edit programme code templates

Sessions

Available placeholders

{id} - The ID of the session

{session_type_code} - The program code of the session's session type

Session blocks

Available placeholders

{day} - The day of the session block

{month} - The month of the session block

{session_code} - The program code of the session block's session

{weekday2} - The weekday of the session block (e.g. "TU")

{weekday3} - The weekday of the session block (e.g. "TUE")

{year} - The year of the session block

Contributions

Available placeholders

{day} - The day of the contribution

{id} - The ID of the contribution

{month} - The month of the contribution

{session_block_code} - The program code of the contribution's session block

{session_code} - The program code of the contribution's session

{track_code} - The program code of the contribution's track

{weekday2} - The weekday of the contribution (e.g. "TU")

{weekday3} - The weekday of the contribution (e.g. "TUE")

{year} - The year of the contribution

Subcontributions

Available placeholders

{contribution_code} - The program code of the subcontribution's contribution

{id} - The ID of the subcontribution
