International Beam  
Instrumentation Conference

Santos Brazil

**Virtual Conference | September 14th - 18th, 2020**

The 9th International Beam Instrumentation Conference (IBIC'20), originally planned for the Brazilian city of Santos, was held as a virtual conference on September 14th – 18th, 2020.

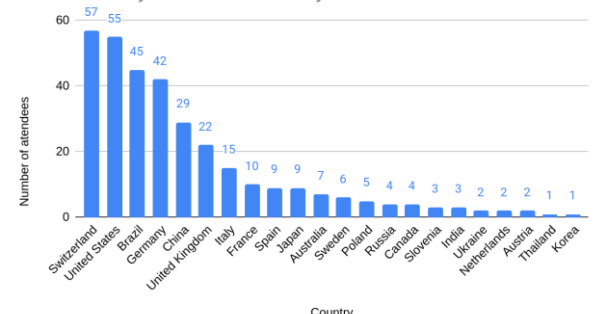

IBIC brings together the world community of experts in beam instrumentation and diagnostics for particle accelerators to explore the physics and engineering challenges of the field and share innovation.

An interactive virtual platform (WHOVA) was prepared and allowed participants to watch prerecorded talks and live sessions as well as freely interact with each other through chats, video meet-ups and theme-oriented discussions. Virtual booths were available for exhibitors to reach out the community and contact the delegates.
