

# 12<sup>th</sup> International Particle Accelerator Conference

Virtual Edition | May 24<sup>th</sup> - 28<sup>th</sup>, 2021 | Brazil

The 12<sup>th</sup> International Particle Accelerator Conference (IPAC'21), originally planned for the Brazilian city of Iguazu Falls, was held as a virtual conference on May 24<sup>th</sup> – 28<sup>th</sup>, 2021.

IPAC is the main international event to discuss the latest achievements in the science and technology of Particle Accelerators, promoting collaboration among scientists, engineers, technicians, students and industrial partners across the globe.

An interactive virtual platform (WHOVA) was prepared and allowed participants to watch prerecorded talks and live sessions as well as freely interact with each other through chats, video meet-ups and theme-oriented discussions. Virtual booths were available for exhibitors to reach out the community and contact the delegates.
